

# Introduction to Advanced Economics

By Yanis Varoufakis

## I. Objective Features of a Society like Greece

List its features -

- I. Racism
- II. Greek culture
- III. Cuisine
- IV. Mediterranean Hotels
- V. Beaches
- VI. Housing
- VII. Poor Housing
- VIII. Lazy People

## II. Parallax View of this set of features

Is it because of culture or cultural problems that Greece is in crisis

Or is it because of something objective  
- like economics or economic policies.

### III. EU and Greece – symmetric to other European countries

EU is about

- I. Finance
- II. Dynamic spending
- III. Eurozone and Euro spending
- IV. Dynamic financialization
- V. Privatisation
- VI. Articulating with America

Now the objective point here is the  
whole thing -

EU is about economics, macro-economics and policies or EU deals with Greece which are well regulated and governed by laws and correct economic theory.

,

## IV. How to Do this

List a set of features and make an objective remark in economic strictness – just the strict economic answer.

## V. Recent Quotes by Yanis Varoufakis

“I believe it is Sirohi who tells us that it is correct to practice the mathematical and poetic Marx as well with this – and we call him even a Cantorian genius for this.”

Greece is –

- I. Poetically by Marx – whole Mediterranean lovely culture with racism and therefore Keynesian in fact by logic of its Tspiras stories.
- II. Aesop’s Fables all around.

EU is -

- I. Poetically again – an economic transaction and deal to the countries which works out as a bunch of financial exchange dynamics – like a EU office and poetry of what is actually privatization and a love for World Bank.
- II. European countries being given the correct policy of course – waxing poetic about Sirohi and his daily news to keep it a working machine.
